

## Flange Plate

### for *modulog* rotating modules

#### Flange plate Ø 170 mm

#### Dimensions

#### Advantages:

- Individual design for fixing of component parts
- Simple mounting
- Standard plate

#### Application

The flange plate can be used instead of the *modulog* flange plate of the rotating modules - horizontal axis DMH and rotating modules - vertical axis DMV.

Compared with the *modulog* flange plate, this plate does not have an 140 x 140 *modulog* interface.

This plate offers the possibility to design individual fixing for component parts. Specific bore patterns or other provisions for the location of component parts or fixtures can be provided by the user.

The flange plate can be easily exchanged against the *modulog* flange plate.

#### Material

Steel, black oxide

#### Note

Fixing of the flange plate at the rotating module is made by the available screws M10 of the rotating module.

#### *modulog* Flange plate

Part no. 6311-400

#### Combinable with the modules

- Rotating module – horizontal axis DMH 200 as per data sheet M 1.101

- Rotating module – vertical axis DMV 1000 as per data sheet M 3.101

#### Application example

Rotating module - vertical axis DMV 1000 with flange plate Ø 170
